Duration	5 mins 49 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

a. Binary search

b. Both (1) & (3)

c. Hash search

d. Linear search ✓

Question **2**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the left sublist

b. In the middle of the list

c. In the right sublist ✓

d. At the beginning of the list

Question **3**

Correct

Mark 1.00 out of 1.00

What happens when the element is found in linear search?

a. The search backtracks to find duplicate elements

b. The search stops immediately ✓

c. The search starts over from the beginning

d. The search continues until the end of the list

Question **4**

Correct

Mark 1.00 out of 1.00

_____ search takes a sorted/ordered list and divides it in the middle.

a. Linear

b. Both (1) & (3)

c. Binary ✓

d. Hash

Question **5**

Correct

Mark 1.00 out of 1.00

The average case occurs in the linear search algorithm

a. When the item is the last element in the array

b. When the item is somewhere in the middle of the array ✓

c. When the item is not the array at all

d. Item is the last element in the array or item is not there at all

Question **6**

Correct

Mark 1.00 out of 1.00

Which of the following scenarios is best suited for applying binary search?

a. When the list is very small

b. When the list is unsorted

c. When the list contains duplicate elements

d. When the list is sorted ✓

Question **7**

Correct

Mark 1.00 out of 1.00

In which type of search is the list divided into smaller sublists during the search process?

a. Linear search
b. Binary search ✓
c. Hash search
d. Sequential search

Question **8**

Incorrect

Mark 0.00 out of 1.00

What happens in a binary search if the list has an even number of elements?

a. The higher middle element is chosen as the middle element
b. The search stops
c. The middle element is chosen randomly
d. The lower middle element is chosen as the middle element ✗

Question **9**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Sorting elements in a list
b. Determining whether an element is present in a list ✓
c. Inserting elements into a list
d. Deleting elements from a list

Question **10**

Correct

Mark 1.00 out of 1.00

Finding the location of a given item in a collection of items is called

a. Discovering
b. Finding
c. Searching ✓
d. Mining

Question **11**

Correct

Mark 1.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 100; What are the mid values(corresponding array elements) generated in the first and second iterations?

- a. 90 and 99 ✓
- b. 90 and 100
- c. 94 and 99
- d. 89 and 94

Question **12**

Correct

Mark 1.00 out of 1.00

In which situation is linear search more efficient than binary search?

- a. When the list is small and sorted
- b. When the list is small and unsorted ✓
- c. When the list is large and unsorted
- d. When the list is large and sorted

Question **13**

Correct

Mark 1.00 out of 1.00

In a linear search, how many comparisons are made in the worst-case scenario to find an element in a list of size n?

- a. n ✓
- b. n/2
- c. 1
- d. log n

Question **14**

Correct

Mark 1.00 out of 1.00

Which of the following statements about linear search is true?

a. Linear search divides the list into halves.
b. Linear search can be applied to both sorted and unsorted lists. ✓
c. Linear search is more efficient than binary search on large lists.
d. Linear search requires the list to be sorted.

Question **15**

Correct

Mark 1.00 out of 1.00

What is the time complexity of linear search in the worst case?

a. O👎 ✓
b. O(n log n)
c. O(1)
d. O(log n)
